Ansell
Protects™

**THE ANSELL
GUARDIAN SOLUTION**

WORKPLACE INJURIES ARE STILL A BIG PROBLEM

In 2019, private companies in the United States reported 2.8 million nonfatal occupational injuries and illnesses¹ associated with their workplace.

It is important to mention that all types of injuries can also represent severe drawbacks for a company's business performance.

Several costs are adding up, from medical expenses to work rehabilitation costs, including the workers' salary compensation.

These injuries include »

BURNS

LACERATIONS

CUTS

FRACTURES

**ALLERGIC REACTIONS
TO CERTAIN CHEMICAL
PRODUCTS AND LATEX**

Indirect costs may be caused by the replacement of workers, demotivation of other workers, productivity loss, and work accident investigations.

Also, local and global occupational health and safety trends are evolving and directly impact the company's economic performance. The current trends:

- Increased health and safety standards and regulations
- Increased focus on durability and waste reduction
- Vendor standardization and consolidation
- Global standardization in supplies and processes

The resulting demands for compliance, consolidation, and simplification necessitate rapid changes and force companies to find new ways to adapt to their workplace needs.

Therefore, it is necessary to provide personal protective equipment (PPE) adapted to the company's needs while reducing associated costs without sacrificing workers' safety.

Reduced injuries by **65%**  Reduced major recordable injuries **6 400**

THE ANSELL GUARDIAN SOLUTION

Ansell GUARDIAN is a program from Ansell which aims to find the proper personal protective equipment best suited for your work environment.

This solution will help you ensure the safety of your employees by increasing your company's performance.

With more than 15,000 assessments and 20,000 chemical assessments since 2010 in more than 55 countries globally, Ansell GUARDIAN positions itself as an undisputed pioneer in the industry. This success is attributed mainly to the highly advanced analytical methods as well as the exclusive Ansell technology.

Since 2014, assessments and recommendations performed by Ansell experts have helped reduce the number of injuries at work by 65% on average and allowed product optimization by 25%. In addition, the implemented recommendations helped save a total of more than \$148 million, which is corresponding to \$65,000 on average.

To help companies choose the best PPE adapted to chemical environments, they are using their database with more than 25,000 chemical substances at your disposal at all times.

WHAT ANSELL DO

SAFETY AND COMPLIANCE

They provide personalized risk management solutions for industrial and chemical environments that improve worker safety, increased regulatory compliance and injury reduction.

COST PERFORMANCE

They implement business performance improvements that result in lower overall costs for your company.

PRODUCTIVITY

They deliver best-practice recommendations to optimize your PPE dispensing, improve your company's output and eliminate waste, leading to increased overall productivity.

HOW THEY DO IT?

By focusing on the most relevant areas, Ansell can deliver best-practice recommendations that most impact your business.

- Analyze**
1. Discuss the company's objectives and make sure to properly understand their health and safety requirements.
- Benchmark**
2. Understand the needs and establish the current performance baseline to quantify improvements later.
- Improve**
3. Development of an implementation plan for business improvement.
- Measure**
4. Quantify the success of the program against baseline measurements and establish new benchmarks.
- Expansion**
5. Implementation of the plan throughout the organization.
- Commitment**
6. Ansell will continue to monitor the success and performance of their recommendations and make adjustments as your business changes over time.
