Spill Kit for Oil and Petroleum Based Products

DEK052

Description

The DEK052 spill kit is the ideal solution for oil and petroleum product spills in the workplace.

This portable, high-visibility spill kit contains absorbents, PPE and accessories with clean-up instructions, so you're ready when a spill occurs.

Material

8 gallons nylon bag with compartments (30L)

Content

- 20 pads (16" x 18")
- Two socks (3" x 48")
- One yellow disposable bag (35" x 50")
- One bag of peat moss 8.8 L
- One disposable mask
- One epoxy paste (10 oz.)
- One pair of nitrile gloves

Peat moss: an organic absorbent with physical characteristics that optimized absorption of liquids such as oils, fuels, solvents and most hydrocarbon products.

Epoxy paste: used for multi-purpose repairs such as sealing, patching and mending. Once hardened, the putty can be drilled, tapped, filed, sanded or painted.

Mask: the disposable mask will protect your respiratory tract from impurities.

Socks: flexible tube that confines and absorbs liquids. Molds around corners and adapts to irregular surfaces.

Yellow disposable bag: The hazardous materials disposal bag has a capacity of 13 to 17 gallons

13" Nitrile gloves: 100% nitrile chemical-resistant gloves

One-ply pads: An oil-only absorbent, as effective on land as on water. Repels water and floats indefinitely, even when saturated.

Spill kit bag: This canvas duffel bag with zipper is easy to quickly assess the products you need. The zipper ensures the products are secure in the bag.

Spill procedure

- Assess the risk:** Assess the spilled substance and identify the source. If you are unfamiliar with the liquid and its chemical properties, leave the area and contact the appropriate authorities.
- Protective clothing:** Wear protective equipment appropriate to the situation. If the source or substance cannot be identified, assume the worst.
- Contain spill:** Contain liquid and seal drains.
- Stop source:** Turn off faucets, rotate perforated drums and plug leaks where possible and safe to do so. Begin clean-up. Use Brady SPC absorbents to safely clean up spills.
- Contact authorities:** Report the spill to the appropriate legal authorities in your community. Be sure to file all necessary reports in accordance with local laws.
- Dispose of used materials :** Absorbent materials take on the characteristics of whatever they absorb. Be sure to dispose of used sorbents and spilled liquids in accordance with local laws.
- Decontaminate:** Clean all tools and reusable materials appropriately before reuse.
- Replace absorbent materials** and safety equipment used in any clean-up operation.
- Review contingency plans and procedures!**
