### Washing instructions and use

#### Washing Instructions:

To clean your hard hat, use warm soapy water and a soft cloth until dirt and grime are removed. The inside of the helmet can be cleaned like the outside. Then dry with a towel and let it finish drying in a warm environment out of the sun.

If you are unable to clean it properly, replace it. It is absolutely not recommended to use chemical products. These products are not suitable for your helmet.

#### Service life:

The service life of Kosto helmets begins from the date of first use. The environment, frequency of use and storage are factors that can affect the duration of its use. The maximum life span of the shell is 5 years and we recommend a replacement every 12 months for the suspension.

It is important for the user to note the date of first use and to regularly inspect the product for cracks or malfunction. If any abnormality is found, the product should be taken out of service.

The shell and suspension should be inspected regularly for cracks or malfunction that would cause the product to be taken out of service. If a defect is detected, the product should be taken out of service.

### Sizing Chart

Size Kosto *		Universal
1	For hat size	cm
